TRIBAL HISTORY

Eldings (Water)

Thousands of years ago, in Ancient Greece, the winds started howling and the sea became rest less. The darker the skies, the higher and more dangerous the waves. Many of us have come to remember this horrible storm as the birth of Poseidon, the Olympian God of the Oceans. But, what many of us do not know, is that Poseidon had a twin who was lost at sea that very same day. This child of the ocean was swept across the world for weeks, as the waves bobbed him up and down. Eventually, the storm came to a stop. Poseidon's twin landed in a new world, a world we now know as Eagle's Landing Day Camp. When the sea and rain finally calmed down, Poseidon's twin was found near an underwater city filled with magical sea creatures that were amazed by this traveler. They immediately crowned him their chief, and named him Elding. The Eldings were born. So, every time Eagle's Landing experiences some "liquid sunshine," beware, because the Eldings are coming for you.

Ladings (Wind)

A couple of hundred years ago, a tornado destroyed the continent of North America. The wind was howling and the skies were gray. Dirt and sand were thrown about, and the people were forced to take cover in their basements for days. This dangerous tornado was created by Chief Lading, the controller of all wind and air. Chief Lading was extremely angry because he was living in a place where the people were not respecting the air. Pollution was everywhere, and clouds of smoke filled the sky. Amazingly, there was one piece of land where the winds were calm and the air was clear. In fact, there was always a lovely breeze! This was the secret home of Chief Lading; it was called Eagle's Landing. He took a group of special kids here to live and care for the air and wind of the Earth. But every time Chief Lading gets angry, the wind will start to howl and the other tribes will know to watch out, because the Ladings are coming.

Delcans (Earth)

A thousand years after the dinosaurs became extinct, there was an archaeologist who began to look for their fossils. She was having a tough time finding them and grew frustrated as she dug for weeks at a time. One day, she grew so angry that the ground started to rumble and the earth started to shake! Thus, the first earthquake began! This was no ordinary earthquake. It split the ground in two, and the archaeologist fell deeper and deeper underground until she finally landed on the wings of an Eagle! The archaeologist was so shocked that it took her a few minutes to realize that the eagle was surrounded by an underground city. The people immediately crowned the archaeologist as their new chief of the Delcans. Yet soon after Chief Delcan arrived, the earthquake reached the city and forced the Delcans to climb on the wings of the eagle, and they were flown all the way up into a magical place called Eagle's Landing! Sometimes, if you sit quietly, you'll feel the Earth begin to shake and you'll know that the Delcans are breaking through the Earth to claim their place at Eagle's Landing.

Camdels (Fire)

In the year 2453, there was (or will be) a small community living on Mars. Earth had long been destroyed, and Mars was the next planet in danger. The people in a small town on Mars known as Camdel, along with their fearless leader, Chief Camdel, came up with a plan to escape their doomed planet. For weeks, a special group of Camdelians worked on borrowing some fire from the sun. What they did not know was that the sun had magical powers. If handled the wrong way, the fire from the sun would change into a time traveling fireball! About two weeks after they got all of the fire they needed from the sun, Chief Camdel asked all of the townspeople to gather around the small ball of fire to watch as the chief, a master of fire, changed the sun's rays into something that could save them all. Right before the chief made the final touches, one of the townspeople tripped and made the chief drop the ball of fire! All of a sudden, the fire burned brighter and swirled around the townspeople. It swept them up and sent them flying in a fiery comet through time into outer space! Finally, the comet crashed into modern day planet Earth. With the help of the sun, the Camdelians landed on a piece of land we now know as Eagles Landing. But watch out! Because on those super-hot days, the Camdelians are ready to fight.
